

THE ONLY CHOICE FOR THE PROFESSIONAL INSTALLER

MB FRAMES PVC-u LTD

FAST APPROACHING 20 YEARS MB FRAMES PVC-u LTD HAS EVOLVED INTO A NAME SYNONYMOUS WITH STYLE AND QUALITY

We have embraced new technologies and manufacturing techniques to create "Royale" the ultimate home improvement range. Two very different Deceuninck systems of the highest quality yet sharing the same accessories, giving you endless adaptability. Energy rated windows, beautiful tough composite doors, tilt and turn windows, slimline patio doors, residential and french doors, vertical sliders, conservatories and bi-fold doors complete the "Royale" family.

Online, real time, ordering and quotation software or if you prefer a knowledgeable team waiting to help in our production and estimating offices. Add a flexible delivery department and a no-nonsense after sales team gives you the complete package to compete in today's tough market.

Classic 70mm Suite

- Multi chamfered 70mm system
- Internally beaded
- High security shootbolts with central claw lock
- High security 8 point door lock
- White, Rosewood or Oak finish
- Fire egress hinges with hinge protectors
- Revolutionary co-extruded grey gasket eliminates shrinkage
- Choice of glazing beads
- Slim sightline and concealed gaskets

Royale window and door suites have evolved and improved over the years. Our PVC-u material is supplied by Deceuninck and both systems are manufactured using advanced CNC machinery, guaranteeing a high standard of quality in our finished product. The Classic Suite is the number one seller still popular for its uncomplicated charm and versatility. The Encore Suite is quite simply the most attractive window system available in the UK today.

THE FIRST DECEUNINCK FABRICATOR IN THE COUNTRY, TO OFFER AN ECOCLEAR A RATED WINDOW

What are Window Energy Ratings...

The Window Energy Rating (WER) labelling scheme was launched in the UK by the British Fenestration Rating Council (BFRC), a Government supported independent body. By using information contained on the label, consumers can reliably compare one product with another and make informed decisions regarding the energy performance of a window.

The A (best) to G (worst) rating system is similar to the labelling already used on white goods. The label gives a rating based on the performance of the whole window (frame and glass) and therefore allows fair comparison of one window with another.

Reduce your carbon footprint...

SGG EcoClear™ offers up to 3 times more thermal insulation than standard double glazing and 20% better insulation than old-fashioned thermally insulating glass. All this without compromising the amount of natural light passing through the glass into your home.

The energy saving calculation is based on an average house with 15m² of glazing. 90 kg CO₂/m²/yr is saved by replacing standard single glazing with SGG EcoClear™ double glazing giving an overall saving of 1350 kg CO₂/yr (source: GEPVP).

Based on these figures, at today's energy cost the saving in year one will be £164.19 (source: www.energysavingtrust.org.uk)

Energy Window	
MB Frames PVC-u Ltd Internally Glazed PVC U Casement Royal Encore Decorative - A1	
Energy Index (kWh/m ² /year) <small>(Energy Index certified by BFRC and based on UK standard window. The actual energy consumption for a specific application will depend on the building, the local climate and the indoor temperature)</small>	4
The climate zone is:	UK
Thermal Transmittance (U _{frame})	1.38 W/m ² .K
Solar Factor (g _{frame})	0.45 W/m ² .K
Effective Air Leakage (L _{frame})	0.00 W/m ² .K
	Reg. No.: 713 www.bfrc.org
<small>This label is not a statutory requirement. It is a voluntary label provided as a customer service to allow consumers to make informed decisions on the energy performance of competing products.</small>
