

# Composite Doors and glass designs

The composite door is the new alternative to PVC-u and timber doors. It's a traditional design with an authentic appearance and comes in an array of colours to compliment any home.

Royale  
Collection

# Welcome Home

If you want your property to give off the right first impression every time, the Royale Collection of entrance doors can help. Each one of our products is designed and constructed with the utmost care, while the attention to detail possessed by our installers is second to none.

To give you that extra peace of mind we back our promises with standard comprehensive guarantees. First impressions count, so make sure your home gives off the right one with one of Royale's composite entrance doors.

## Royale Composite Doors offer a perfect solution.

Our composite doors are made from fibreglass with steel reinforcement and a rigid, high density, energy efficient polyurethane core, whilst giving you the appearance of a solid timber door.

This innovative man-made material is lightweight, yet extremely strong. It isn't prone to significant expansion and contraction as the temperature varies with the weather, so composite doors will never warp or twist. They will never rust, flake or peel either, so you never need to repaint them.

## The Royale Collection A better choice for your home

The composite doors within this brochure are engineered using modern materials that offer many practical benefits, ensuring an entrance of the highest quality that will last for years.

Each door is low maintenance and does not require labour intensive painting or varnishing.

Available in a choice of colours, the range also offers benefits in terms of security, weathering and energy saving.

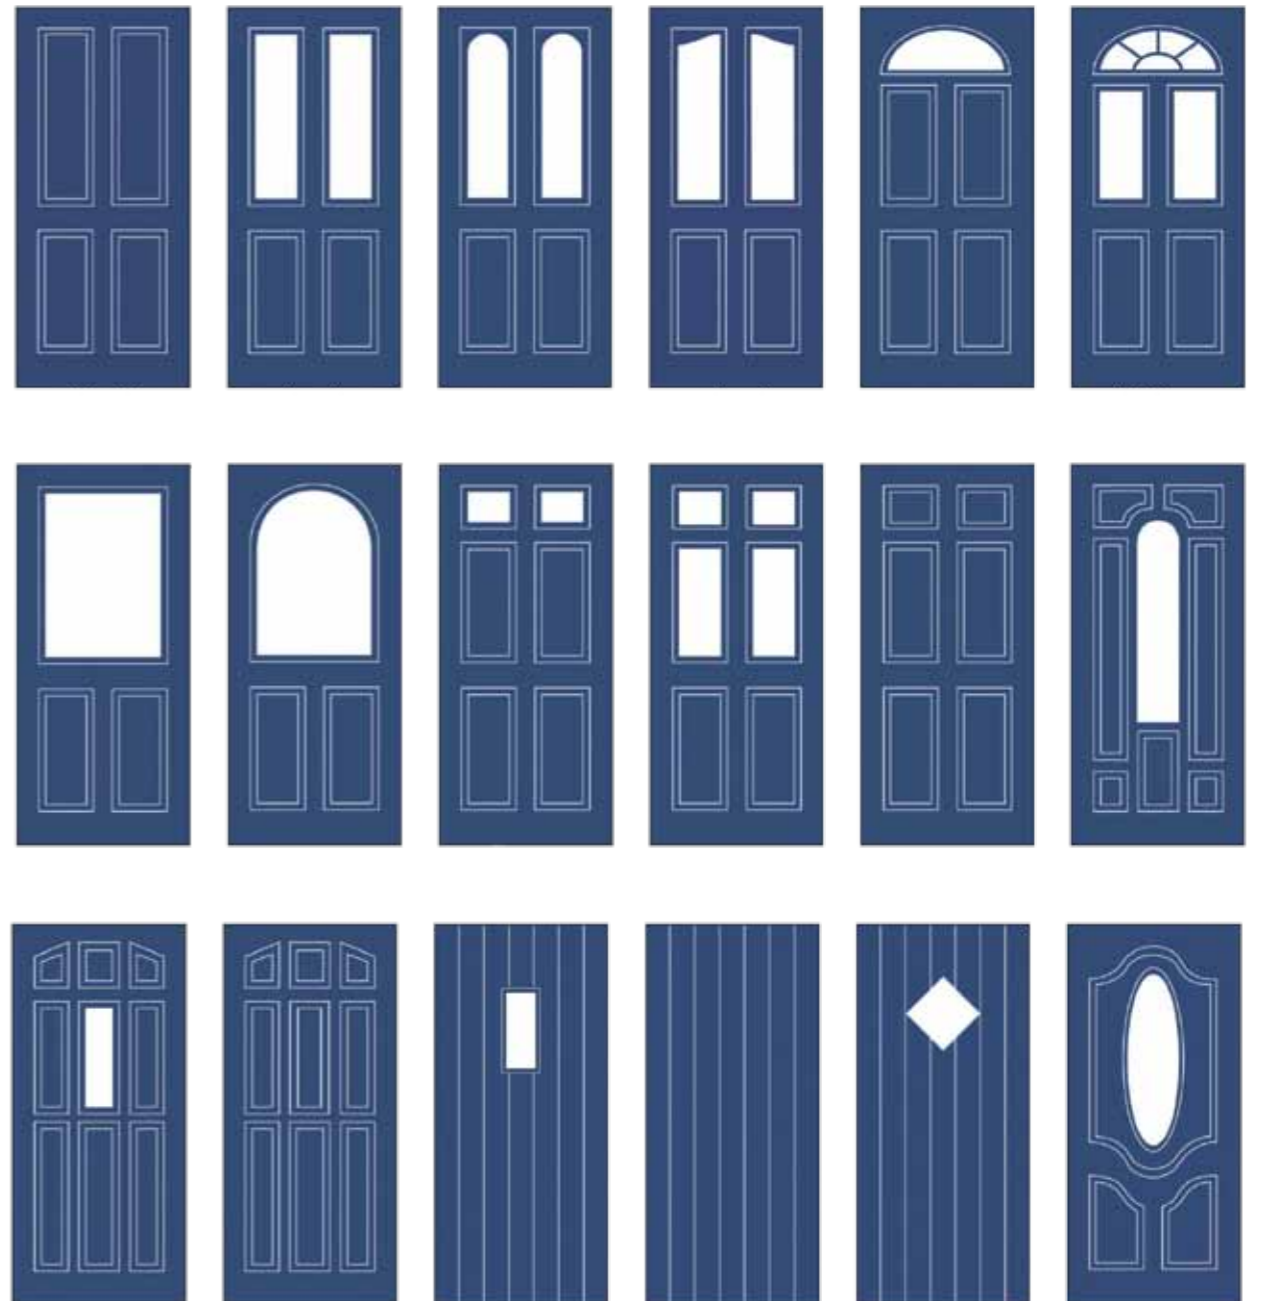

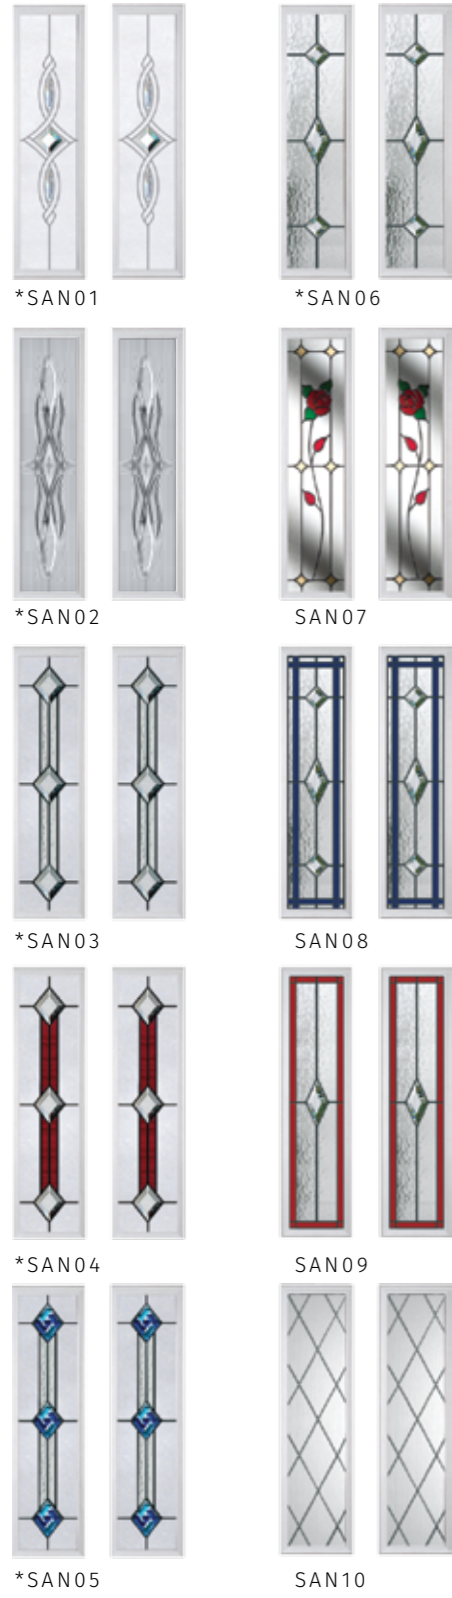

# Royale Door Styles

The composite doors within this brochure are engineered using modern materials that offer many practical benefits, ensuring an entrance of the highest quality that will last for years.

Each door is low maintenance and does not require labour intensive painting or varnishing. A simple wipe with a damp cloth will restore each door to its original splendour.

Available in a choice of colours, the range also offers benefits in terms of security, weathering and energy saving.
