High security, energy efficient, composite entrance doors brought to you by Royale

Contents

- 2 Thermal Efficiency
- 3 Introduction
- 4 - 15 Signature Doors
- 16 - 21 Cottage Doors
- 22 - 23 Solid Doors
- 24 - 43 Contemporary Doors
- 44 - 45 Colour Range
- 46 - 47 Hardware
- 47 - 48 Customer Care Guide

Looking after our world and your wallet...

The rising cost of energy bills and the impact on the environment means we all want to keep our consumption to a minimum. By choosing our thermally efficient products you can keep the warmth in and the cold out.

Look out for the energy rating of each door throughout the brochure!

19% more thermally efficient than a 48mm solid timber core composite door

17% more thermally efficient than a 44mm traditional timber panelled door

Doors were tested at the University of Salford's Energy House. This represents a typical Salford 1919 terraced house and its construction represents 21% of the UK's current housing stock. The house has been reconstructed in a fully environmentally controllable chamber, in which climatic conditions can be maintained, varied, repeated and patterns monitored. For the test, the inside temperature of the Energy House was 25°C with an exterior temperature of 5°C. All energy ratings are indicative only.

Our long lasting, high security, Composite doors will transform your home beautifully, whilst giving you total peace of mind when it comes to keeping unwanted visitors out.

The luxurious Royale Collection offers a plethora of different styles, and a wide range of decorative glass options for you to choose from.

Choose any RAL for the inside and the outside

Huge range of stunning colours, browse them all on page 44 - 45 or visit the door designer to create your dream door.

“A versatile door design,
and our most popular for
obvious reasons”

Colour

- The PVCu door outerframe is supplied in White as standard.
- A limited number of coloured door frames are available (please ask your installer for further details).
- The composite door slab and PVCu outerframes are made from different materials, we therefore cannot guarantee an exact colour match due to the difference in surface finishes.

Our standard colours

Bespoke Colours

Our doors come with an exceptional 10 years surface warranty or 5 years for those colours denoted with an asterisk

Colours shown should be used for guidance only as the limitations in the printing process, may mean that colours vary from those illustrated. * The doors indicated have a 5 year colour warranty.

Faldo, Gramacho, Gramacho Glazed, Millenium, Ocean & Pinta: White or Bespoke.

Espiche, Balaia, Santo Antonio & Benamor: Black, White, Gold Oak, Rosewood, Distinction Chartwell or Bespoke. White on internal side.

Hardware

the perfect finishing touch

Heritage Lock

The Heritage lock also features slam shut locking, but replaces the contemporary bar handle with a traditional finger pull and thumb-turn escutcheon plate.

Available in PVD chrome, PVD brass and satin chrome finishes.

*Minimum door width to accept the Heritage Lock is 870mm overall.

Contemporary Lock

Make a statement with a modern bar handle. Available in a range of lengths, these handles compliment the mid-point locking position of the Contemporary lock, and ooze style and quality with their stainless steel construction. In addition to looking great, these handles and the ease of operation are available fitted inside and out, or to the outside only.

When your door is in the closed position, always lift the handle set to engage the deadbolt and hooks. This will help with keeping your door aligned in the correct frame position and help to combat thermal movement.

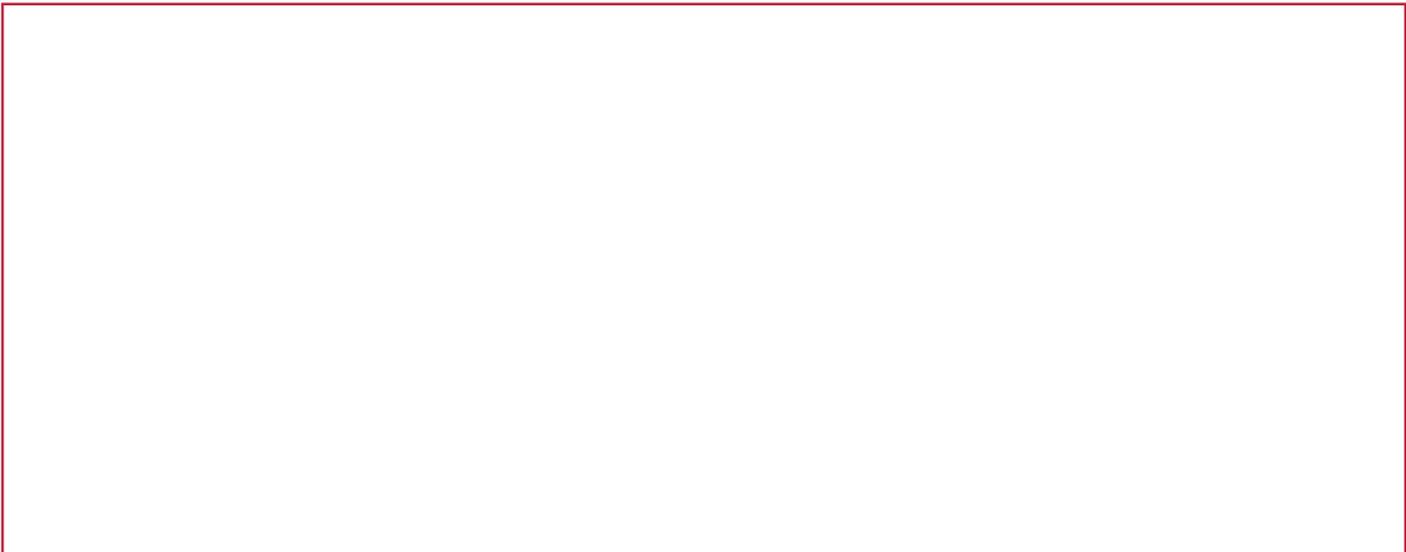

In order to comply with your warranty and to prolong the life of the surface, a small amount of care and attention is needed. How often will depend on where you live. In a coastal or heavily industrialised area or near a main road, cleaning may need to be more often.

We recommend that you only use warm soapy water (washing up liquid is suitable) with a lint free cloth and wipe dry with a soft clean cloth for the doors surface, as well as a little lubrication for operational parts; lock, hinges. Please refer to our 'Operation, Cleaning and Maintenance' instructions on our Website.

Please do not...

- Use abrasive cleaners or scouring pads
- Use pressure washers or steam cleaners
- Apply any type of bleach or solvent
- Apply any adhesives of any type or tack
- Have any contact with any sharp objects
